## **Suffering Mild to Gut-wrenching Emotional Distress? This Beautiful African Flower Will Instantly Help You.**

We live in rough times, don't we?

Corona. Heartbreaks. Asshole bosses. Toxic family. Gloomy news. Concrete Jungles. Personal tragedy...

It's no wonder we suffer from so much melancholy... Insomnia... Sadness... Depression... Anxiety... And other gut-wrenching emotions.

But in the middle of all this suffering, grows a beautiful African flower...

### **Meet Griffonia Simplicifolia**

Griffonia is a tall, woody climbing bush. With greenish flowers and tiny pebble-sized black beans.

But these are no Crockpot Baked Beans... These seeds are cherished for a whole different reason.

They contain a precious molecule called...

The 5-HTP.

Placed under the tongue, 5-HTP easily enters the bloodstream. Passing the blood-brain barrier, it metabolizes into Pure Serotonin — The Happiness Molecule. Brain's main neurotransmitter.

And why is this important?

**Because we — as a society — chronically lack serotonin.**

*Every* single one of us is going through something difficult right now. Something that keeps our hopes down and our optimism waning... Be it

- **Hair-raising news.**
- Corona health anxiety.
- **Toxic family members.**

- Big stressful changes.
- **Heartbreak.**
- Uncertain future.
- **Nightmarish past.**
- Negative mind chatter.
- **Severe personal tragedy.**
- Asshole bosses.
- **Endless concrete jungles.**

All these lead to emotional distress. And low levels of serotonin are tightly correlated with it.

## **Natural Way To Shield Yourself From Negativity**

Griffonia is a natural, safe way of boosting serotonin levels — enhance your mood, well-being, and shield yourself from negativity.

It's a darling to many clinical trials. Used to test the effectiveness of other, artificially produced drugs that affect your serotonin levels. (Known as 5-HTP induced syndrome tests.)

This means...

That Griffonia flower is the real deal...  
And not some word-of-mouth superstition.

## **Inspire Positive Action.**

So, should you take Griffonia?

Take it if you want to...

1. Improve your well-being.
2. Shield yourself from negativity.
3. Chew through tough times faster, with less struggle.

With its euphoric effect, Griffonia will inspire positive action helping you to fix your life — and protect you from negativity while doing so.

## **Boost Self-Control.**

Also...

You know how you stress-eat when under pressure?

Taking Griffonia with meals promotes the feeling of fullness. Thus preventing unhealthy coping with food while still maintaining a normal appetite!

## 20 Life-Affirming Benefits

By raising your serotonin levels, Griffonia will:

- **Make you happier.**
- Enhance your mood.
- **Help you deal with toxic people.**
- Tune down the negative mind chatter.
- **Shield you from bloodcurdling news stories.**
- Improve sleep.
- **Boost self-control.**
- Heal a broken heart.
- **Reduce junk-food cravings.**
- Shield you against fear and anxiety.
- **Nudge you towards positive actions.**
- Instill optimism.
- **Relieve distressing emotions.**
- Make you appreciate life more.
- **Help deal with the uncertainty of the future.**
- Help you mourn over the loss of a loved one.
- **Make you hopeful.**
- Make you more productive.
- **Dwindle hot flashes in menopause.**
- Ease addiction and withdrawal symptoms.

### #1 Aid In Improving Your Life.

Our users typically stop taking Griffonia (with no adverse effects) once their life situation has improved. And have chewed through tough emotions...

Yet some continue to take it as it provides natural, safe protection from negative energies of the modern world.

When you first start consuming Griffonia, you might experience mild nausea. In this case, we recommend taking Griffonia with meals. Nausea normally goes away after 7-10 days.

## **Special Offer**

Order now to try 5-HTP Griffonia supplement 100% Risk-Free for 30 days.

If you're not satisfied, simply return the unused portion — or even just the empty bottle.
